

DAKSH PATEL

dakshpatel201199@gmail.com | 705-970-7725
<https://github.com/DaxDS> | <https://ai-portfolio-xi-lilac.vercel.app/>

Skills

Languages: Python, Bash, PowerShell, SQL

Technologies & Tools: TensorFlow, PyTorch, scikit-learn, NumPy, Pandas, OpenCV, Lang Chain, Azure, Aws

Work Experience

Reality.AI Remote

Jan 2025 - Present

AI Developer

- Built and deployed generative AI solutions leveraging GPT based architectures to automate content creation, resulting in improved workflow efficiency and higher user engagement across varied audience segments.
- Developed reusable AI agents using python, Open AI APIs, and Lang Chain, enabling scalable automation for multiple use cases.
- Designed and validated agent workflows using Jupyter Notebook and real - world data, ensuring reliability, accuracy and contextual relevance in outputs.
- Collaborated through GitHub for version control, feature development, and code reviews, supporting structured delivery practices.
- Python, Lang Chain, OpenAI APIs, Jupyter Notebook, Git Hub.

Georgian College, Barrie

Mar 2024 - Aug 2024

Artificial intelligence Intern

- Optimized machine learning models, improving trend forecasting accuracy and recommendation relevance by 18%.
- Applied deep learning techniques for automated text summarization, reducing manual document processing time by 30%.
- Build computer vision solutions such as Facial recognition and gesture-based volume control for intuitive, contact-free interaction.
- Used python, OpenCV and TensorFlow to prototype and validate computer vision models, accelerating experimentation and delivery cycles.
- Python, TensorFlow, OpenCV.

Project Work

- **Intelligent Article Generation web app(2025):** Co-developed a researcher agent to extract match formations, turning points and key events: built a fact-checking agent using retrieval logic to validate outputs and improve narrative accuracy.(python, Lang chain, OpenAI APIs)
- **Insight Forge – AI Business Intelligence Assistant(2025):**Built a full stack RAG based AI assistant that converts raw business data into insights, integrating memory components and dynamic Stream lit dashboards to support natural language analysis and decision making.(python, Lang Chain, RAG, stream lit)
- **Gesture based Volume Control (2024):** Developed computer vision solutions including gesture-based volume control and facial authentication, enabling intuitive, hands free interaction and secure access features for commercial applications.(OpenCV, TensorFlow, Media pipe, python)

Education

Georgian College

Jun 2023 - Mar 2024

Post Graduation in Information and Network Security

Georgian College

Apr 2023 - Dec 2023

Post Graduation in Artificial Intelligence

Gujarat Technological University

Jul 2017 - Mar 2021

Bachelor of Computer Engineering

Certificates

- **Applied Gen AI specialization** – Purdue University
- **Gen AI Fundamentals** - Microsoft
